Team Member Evaluation

Team Members

Ryan Vinh

Miguel Chavez

Ryan Burke

Ryan Vinh

Ryan has been super engaging with our app process. He's helped a lot with defining the backend app logic and writing up the planning for our app.

Miguel Chavez

Miguel made a lot of the group's initial big moves (i.e. connecting the group and creating the repo). In addition, he worked along-side both Ryan's in developing the backend app logic and Activity layout

Ryan Burke

Ryan's helped with UI design, backend app logic, and database design.

In all, everyone's contributed an equal amount.
